

CLEANING ■ SEALING ■ MAINTENANCE

Sealing and maintenance solutions for all types of stone, porcelain, quarry, terracotta and glazed ceramic

MOULDEX EXTERNAL PAVING CLEANER TECHNICAL DATA SHEET REF: 25/5

LTP MOULDEX PAVING CLEANER

Kills & removes mould spores, black spot, lichen, fungus & algae from all types of external natural and artificial stone including concrete pavers.

Antibacterial action helps prevent re-growth.

Formulated to cling to surfaces and remove mould spores, black spot, lichen, fungus, algae and moss from other damp places. Bleaching action helps restore natural stone and paving to its original colour.

Directions for use

SHAKE WELL BEFORE USE. This product contains bleaching action, if in doubt try on an inconspicuous area before general application.

Surfaces to be treated should be completely dry before application. Pour solution undiluted directly onto the pavers and spread out evenly using a sponge or paint brush. Garden sprayers can also be used. Leave for a minimum of 1 hour. Apply a little water and agitate with a stiff Deck brush or emulsifying pad to release the dirt and grime. Rinse thoroughly using a hose or jet wash.

Some stubborn stains and black spot may require a longer treatment, in which case apply and leave on surfaces overnight. If some black spot remains after treatment, It should fade and disappear after a few days following the treatment. If not: re-apply.

Keep pets off at all times during treatment. In case of contact with metals, fabrics and painted surfaces rinse with water immediately. Do not use on warm surfaces. Do not apply if rain is imminent. Avoid contact with plant life: if contact is made rinse well with plenty of water.

Do not use with acid based removers or other acid based cleaners.

Can be used on all types of natural and artificial stone, however always test on an inconspicuous area before general application.

Further Treatment: treating newly cleaned surfaces with Mattstone H2O will prevent moisture and organic particles from absorbing into the surface, thereby reducing the growth of algae and black spot.

This information is offered without guarantee. The material should be used so as to take account of the local conditions and the surfaces to be treated. In case of doubt, the product should be tried out in an inconspicuous area.

for beautiful surfaces we have the solutions...
